WORKING KNOWLEDGE OF CBS (FINACLE)

Menu & Procedure Handbook for POSB Counter Operations

For LDCE IP / PS Group 'B' Examination & Daily Counter Work

DISCLAIMER

*This booklet has been prepared strictly from an examination and working-reference point of view. Every effort has been made to ensure accuracy and to incorporate recent changes, amendments, orders and circulars relating to the Core Banking Solution (Finacle) and Post Office Savings Bank operations. It is, however, a study aid only and is **not a substitute for the POSB CBS Manual, SB Orders or CEPT/CPRC instructions**. Finacle menus, on-screen fields and procedures are revised from time to time through software upgrades and departmental orders. Readers must always confirm the current position against the latest POSB CBS Manual, SB Orders and official Directorate / CEPT advisories before relying on any step for a live transaction.*

1. Introduction – CBS, Finacle and How to Use This Booklet

The **Core Banking Solution (CBS)** of the Department of Posts is the centralised system through which all Post Office Savings Bank (POSB) accounts are operated on a single national database. The banking application used by the Department is **Infosys Finacle**; insurance (PLI/RPLI) runs on a separate application called McCamish. Banking and insurance therefore have different URLs, though both are accessed from within the CSI environment. At a post office counter, Finacle is opened in a web browser; at Branch Offices, the **RICT / DARPAN** hand-held device runs a mobile version of the Finacle banking application for basic deposits, withdrawals and a few non-financial tasks.

Every post office is identified in Finacle by a unique **SOL ID** (Service Outlet identifier). Several office and sundry account numbers are built by prefixing the SOL ID to a fixed suffix (for example, the MIS sundry account is **SOLID + 0337**).

THE MAKER-CHECKER (PA – SUPERVISOR) PRINCIPLE

Finacle works on a strict **maker-checker** model. The **Postal Assistant (PA)** is the *maker* who enters a transaction or creates/modifies a record; a **Supervisor** is the *checker* who verifies and authorises it. A record or transaction does not take effect until it is verified.

In the steps below, an instruction such as “Verify by **CASBAV**” or “Super-invoke **CCRC**” simply means: the Supervisor logs in with supervisor credentials and runs the stated verification menu to authorise the PA’s entry.

A transaction in ‘**Entered**’ state can be *deleted* but **cannot be modified**. Once it is **posted/verified it cannot be altered** at all – so accuracy at the counter is essential.

How to read the command paths

Each task lists the **menu code** (the short code typed into the Finacle menu box, e.g. **CASBAO**) followed by the navigation “path”. The symbol “>” means “then” – i.e. the next field, button or selection. Menu codes are shown in **bold blue** throughout for quick scanning, and the matching **verification menu** is given at the end of each entry.

2. Glossary of Key Terms & Abbreviations

The following abbreviations recur throughout CBS work and in the examination.

Term	Meaning
CBS	Core Banking Solution – centralised, networked banking platform
Finacle	The banking software (by Infosys) used by DoP for POSB operations
McCamish	The separate software used for PLI / RPLI (insurance)
SOL ID	Service Outlet identifier – unique code of each post office
CIF	Customer Information File – the master record of a customer
PA / SU	Postal Assistant (maker) / Supervisor (checker / 'SU' role)
POSA / SB	Post Office Savings Account / Savings Bank account
TDA	Time Deposit Account type – covers TD, MIS, SCSS, RD, NSC, KVP
RD / TD	Recurring Deposit / Time Deposit
MIS / SCSS	Monthly Income Scheme / Senior Citizens' Savings Scheme
PPF / SSA	Public Provident Fund / Sukanya Samriddhi Account
NSC / KVP	National Savings Certificate / Kisan Vikas Patra
MSSC	Mahila Samman Savings Certificate (closed for new accounts – see §4)
DSA / Agent	Direct Sales Agent (SAS / MPKBY / PRSS agent)
KYC / e-KYC	Know Your Customer / Aadhaar-based electronic KYC
CPC	CBS Central Processing Centre (Circle level)
CPRC	Centralised Processing & Reconciliation Centre, Chennai (from 2025)
APT 2.0	Advanced Postal Technology solution (accounting / DTR)
DTR	Daily Transaction Report
IMA	Internal Mobile Application (used to trigger BO day-end)
EOD / COD	End of Day / Close of Day; BOD = Begin of Day
RICT / DARPAN	Rural ICT hand-held device used at Branch Offices

3. Customer Information File (CIF) Management

The CIF is the customer's master record. A customer must have a CIF before any account can be opened, and one CIF can hold many accounts. Always check first whether the customer already has a CIF – use **CDEDUP** (de-duplication enquiry) to avoid creating a duplicate.

- ▶ **CIF Creation** – '**CCRC**'. Creates a new customer record. Path: invoke **CCRC** > Function "Add" > Go > Title > First / Middle / Last name (full name) > Father's / Husband's name > Date of birth > Gender > Tax status > PAN number > Income and Income type > Occupation type > Document details (document type, document code, enter ID; click "expand" for additional documents and tick "preferred = Yes" for one) > Address details > Phone / e-mail details > TDS table code > Primary Relationship Manager ID (enter CIFRM) > Short name > Submit, and **note down the CIF number. Verify** by super-invoking **CCRC**.
- ▶ **CIF Modification** – '**CMRC**'. Updates an existing CIF (name correction, contact details, PAN, etc.). Path: invoke **CMRC** > Function "Modify" > make the required changes > Submit. **Verify** by super-invoking **CMRC**. (The same menu is also used to suspend a CIF ID.)
- ▶ **CIF Merger** – '**HCCA**'. Used when one account must be moved from an old CIF to another (correct) CIF – e.g. duplicate CIFs created for the same customer. Path: invoke **HCCA** > Function "Modify" > enter the account number whose CIF is to change > Go > Old CIF ID > New CIF ID > Reason code > Submit. **Verify** by super-invoking **HCCA**.
- ▶ **CIF Inquiry** – '**CICD**' / '**CCIFINQ**'. **CICD** shows the CIF ID linked to a given account (and, for e-KYC CIFs, the masked Aadhaar). **CCIFINQ** finds a CIF by entering the customer's **Aadhaar number** or **mobile number**. (**HCRV** – Customer Relationship View – may also be used to inquire on CIFs.)

4. Account Opening

Every account is opened against an existing CIF. The maker opens the account; the Supervisor verifies it; the account number is then active. Note the new account number (and Transaction ID where one is generated).

- ▶ **Savings Bank (SB) — `CASBAO`.** Path: invoke **CASBAO** > Function “O” (Open) > enter CIF ID > select SB scheme code > Go > Mode of operation > number of documents, document code, document date > related-party and nomination details (if any) > Submit > OK > **note the account number. Verify** by super-invoking **CASBAV**. (Modify before verification = **CASBAOM**; after verification = **CASBAM**.)
- ▶ **Recurring Deposit (RD) — `CRDOAAC`.** Path: invoke **CRDOAAC** > Function “O” (Open) > CIF ID > scheme code **RDIPN** > Go > Mode of operation > monthly instalment > transaction type (enter debit account if “Transfer”) > document details > nomination (if any) > Submit > flow ID > Submit > **note the RD account number and Transaction ID**. If opened through an **agent**, enter the agent ID near the monthly-instalment field. **Verify** by super-invoking **CRDOAACV**.
- ▶ **Sukanya Samriddhi (SSA) & PPF — `CPPFAO`.** Path: invoke **CPPFAO** > Function “O” (Open) > CIF ID > scheme code > Go > Mode of operation > number of documents, document code, document date > Submit. **Verify** by super-invoking **CPPFAV**.
- ▶ **TD, MIS, SCSS, NSC, KVP — `CMISAOP`.** All these certificate / time-deposit (TDA) schemes are opened through one menu by choosing the product group and scheme code. Path: invoke **CMISAOP** > Function “O” (Open) > Product Group > Scheme code > Go > Mode of operation > deposit amount > agent ID (if any) > nomination (if any) > transaction type > document details > interest-credit account > renewal option > Submit > flow > Submit > **note account number and Transaction ID. Verify** by super-invoking **CMISAOPV**.
- ▶ **RD Loan Account — `CAOLARD`.** Opens a loan account against an eligible RD. Path: invoke **CAOLARD** > Function “Open” > CIF ID > scheme code **LARD** > Go > name > loan amount > instalment frequency > amount > Submit > OK > **note loan account ID. Verify** by super-invoking **CAOVLRD**.

MAHILA SAMMAN SAVINGS CERTIFICATE (MSSC) – IMPORTANT CURRENCY POINT

MSSC was a women-only certificate (TDA-type) scheme opened through **CMISAOP**. **New accounts could be opened only up to 31 March 2025** (Department of Economic Affairs / Ministry of Finance notification); **no fresh MSSC accounts can be opened now**.

Existing MSSC accounts continue to earn 7.5% p.a. (compounded quarterly) until their 2-year maturity and are serviced through the normal TDA menus. Per **SB Order 12/2025**, MSSC interest credited quarterly is **accounted only at the time of closure** of the account.

5. Modification of Accounts (after verification)

Use these menus to change account-level details after the account has been verified. (Changes made before the account is verified use the "... before-verification" variants noted in §4.)

Scheme	Modification menu (after verification)
Savings Bank (SB)	CASBAM
Recurring Deposit (RD)	CRDACM
SSA / PPF	CPPFAM
TD / MIS / SCSS / NSC / KVP	CMISAM

Related useful menus: **HCBM** – change customer status from **Minor to Major**; **HACXFRSC** – scheme-code change / account conversion; **HAFSM** – account freeze / unfreeze.

6. e-KYC (Aadhaar-Based) Operations

e-KYC allows a customer's identity to be verified through Aadhaar biometric authentication, with most CIF fields fetched directly from UIDAI. The governing procedure is the **SOP for e-KYC (Annexure to SB Order No. 01/2025)**.

e-KYC menus

Menu	Purpose
`ECCRC`	Create an e-KYC CIF ("New Customer"); also converts an existing CIF to e-KYC via Re-KYC
`ECMRC`	Modify an e-KYC CIF
`CASBAO`	Open a single-individual (adult) POSA account using e-KYC
`CASBAM`	Modify a POSA account / Supervisor inquiry-verification under e-KYC
`CTM` / `CXFER`	POSA transactions – by Aadhaar authentication, or by paper pay-in slip / withdrawal form
`CICD`	Displays the masked Aadhaar (XXXX-XXXX-1234) for an e-KYC CIF

Menu	Purpose
KEY POINTS FROM THE e-KYC SOP (SB ORDER 01/2025) Obtain the e-KYC consent form (SB-eKYC-1) and the e-KYC Account Opening Form (SB-eKYC-AOF). The PA invokes ECCRC and selects “New Customer”, then enters the Aadhaar number (PAN and mobile if available). On authentication, Name, Father’s/Husband’s name, Date of Birth, Gender, Address and Pincode are auto-populated from UIDAI and are not editable (City/State/Country derive from the Pincode). The customer’s photograph is received from UIDAI. On successful biometric authentication the transaction posts to the ledgers without separate supervisor verification. For a debit transaction above ₹5,000, the existing paper-based process under the POSB CBS Manual is followed. Consent forms (SB-eKYC-1) are scanned and preserved for 7 years; the DBT mandate form is preserved for 10 years.	

7. Daily Transactions (Deposits, Withdrawals, Interest)

- ▶ **SB Deposit / Withdrawal — `CTM`**. Path: invoke **CTM** > Function “Add” > Function type “Deposit” or “Withdrawal” > Go > account number (credit for deposit / debit for withdrawal) > amount > Submit. For a **transfer** (not cash), use **CXFER**. **Verify** by the Supervisor on the same menu.
- ▶ **RD Deposit — `CRDP`**. Path: invoke **CRDP** > Function “Add” > transaction type > Go > account number > amount > Submit. Transaction types: **C/NR** (cash), **T/BI** (transfer, bank-induced – used for missing/credit corrections by the office), **T/CI** (transfer, customer-induced – cheque given by customer).
- ▶ **RD Loan Disbursement — `LARDD`**. Path: invoke **LARDD** > Function “Disbursement” > loan account ID > amount > mode of disbursement > credit account ID (if required) > Submit > OK.
- ▶ **RD Loan Repayment — `HLAUPAY` / `HPAYOFF`**. Use **HLAUPAY** for a **part** repayment of the RD loan, and **HPAYOFF** for **final / full** pay-off (closing the loan).
- ▶ **SSA / PPF Deposit — `CPDTM`**. Path: invoke **CPDTM** > Function “Add” > transaction type > Type “Normal contribution” > Go > account number (credit) > amount > Submit. (**CPDTM** also handles all future PPF deposits and loan repayments.)
- ▶ **SSA / PPF Withdrawal — `CPWTM`**. Path: invoke **CPWTM** > Function “Add” > transaction type > Type “Normal Withdrawal” > Go > account number (debit) > amount > Submit. (**CPWTM** is also used for PPF part-withdrawal.)
- ▶ **TD / MIS / SCSS Interest Payment — `HTM`**. Interest on TDA accounts is not credited to the deposit account itself: where an SB account is linked it is auto-credited there; otherwise it is parked in the scheme **Sundry account**. To pay out parked interest, use **HTM**: invoke **HTM** > Function “Add” > transaction type **C/NP** (Cash Normal Payment) > Go > on the next screen, Debit A/C = the scheme Sundry account > amount > Reference No = account number > restore value / additional part-transaction > Go > delete both start and end amount > Reference No = account number > Go > tick the check box > Accept > back > Post / Submit. Interest may be paid by **cash, transfer to SB, or post-office cheque**.

8. Approval of High-Value Withdrawal

Cash withdrawals at or above the system-defined high-value limit are held for Supervisor approval before payment.

► **High-Value Withdrawal Approval — ‘EXCW’.** Path: invoke **EXCW** > Function “Modify” > enter the account number > click the search mirror in “Request ID” and select the pending request > Go > Approve or Reject > Submit. The approval is given through the Supervisor login.

NOTE ON THRESHOLDS

The exact high-value figure that triggers **EXCW** is a system-configured parameter and is **not asserted here** to avoid stating an outdated number – confirm the current limit locally / in the POSB CBS Manual.

Separately, ‘CWDREP’ generates the report of **SB withdrawals above ₹10,000** for monitoring.

9. Sundry / Office Account Codes

These office accounts are formed by prefixing the office’s **SOL ID** to the suffix shown. Unpaid TDA interest collects in the scheme-wise sundry accounts; transactions on these accounts are verified on the same menu used to post them.

Account / purpose	Number = SOL ID +
MIS sundry (unpaid interest)	0337
SCSS sundry (unpaid interest)	0338
TD sundry (unpaid interest)	0335
1-Year TD	0129
2-Year TD	0130
3-Year TD	0131
5-Year TD	0132
ATM cash (loading / removal)	0005
BO / Branch Settlement Account	0339

10. Closing of Accounts

STANDARD CLOSURE SEQUENCE (FOLLOW STRICTLY)

Always select **Trial Close** first > choose the **closure reason code** > select the **repayment mode** (cash / transfer / cheque) > go to **HPR** to **view / print the closure report** > **show the closure amount to the account holder** > obtain the holder's **signature on the receipt portion** of the closure form > then actually **Close** > Supervisor **verifies**.

Source: Directorate guidelines on closure in CBS post offices and the POSB CBS Manual – intended to prevent wrong/again-disputed payments.

- ▶ **SB / SSA / PPF – 'HCAAC'**. Invoke **HCAAC** > Function "Close" > account ID > Go > Transaction Type (Cash / Transfer) > give repayment account > Submit. **Verify** by invoking **HCAAC**.
- ▶ **Recurring Deposit (RD) – 'CRDCAAC'**. Invoke **CRDCAAC** > Function "Trial Close / Close" > account ID > Go > tick "Close" > closure reason > Cash / Transfer > give repayment account > Submit. **Verify** by **CRDCAAC**.
- ▶ **RD Loan Account – 'CAACLA'**. Invoke **CAACLA** > Function "Close" > account ID > Go > tick "Close" > closure reason > Accept > Submit. **Verify** by **CAACLA**.
- ▶ **TD / MIS / SCSS – 'HCAACTD'**. Invoke **HCAACTD** > Function "Trial Close / Close" > account ID > Go > "Close Detail" tab > Close Mode > "Closure Exception" tab > closure reason > Submit > note the ID. **Verify** by **HCAACVTD**.
- ▶ **NSC & KVP – 'CSCCAAC' / 'CNSBCV'**. Use **CSCCAAC** for closure of a **single** certificate account and **CNSBCV** for **bulk** closure; each is verified on the same menu.

11. Agent (SAS / MPKBY / PRSS) Related Commands

- ▶ **Agent Creation — `HDSAMM`.** Invoke **HDSAMM** > Function “Add” > DSA ID > Go > DSA turnover frequency = “Daily” > Next turnover date = **31/12/2099** > commission-credit account > Tax code **TDSAG** > expand the page > agent type > licence expiry date > Set ID = SOL ID > scheme code > payment frequency = Daily (click “Add” for more schemes) > “Commission Parameter” tab > fixed-commission start date = next date > Submit > OK. **Verify** on the same menu.
- ▶ **Agent Modification / Renewal — `HDSAMM`.** Invoke **HDSAMM** > Function “Modify” > DSA ID > Go > “General” tab > for renewal, update the **licence expiry date** > “Commission Parameter” tab > fixed-commission start date = next date > Submit > OK. **Verify** on the same menu.
- ▶ **Agent Inquiry — `HDSAIP`.** Invoke **HDSAIP** > Function “Display” > SOL ID > Go.
- ▶ **Agent List Posting — `HAGTXP`.** Used to post the agent’s bulk RD list. Invoke **HAGTXP** > Function “Modify” > Agent ID > enter Reference No > Go > tally the figures > Post. **Verify** on the same menu.

12. Other Workflows

- ▶ **Atal Pension Yojana (APY) — `CAPY`.** Invoke **CAPY** > Function “Add” > Go > account ID > complete the required fields > Submit. **Verify** on the same menu.
- ▶ **ATM / Debit Card Issue — `CCMM`.** Invoke **CCMM** > Go > complete the required fields > Submit. **Verify** on the same menu.
- ▶ **ATM Cash Loading / Removal — `CTM`.** **Loading:** **CTM** > Withdrawal > **SOL ID + 0005**. **Removal:** **CTM** > Deposit > **SOL ID + 0005**.
- ▶ **Add Inventory at the SO — `HIMC`.** Invoke **HIMC** > Function “Add” > Go > From Location Class **ZZ**, From Location Code **EXT** > To Location Class **DL**, To Location Code **DL** > Accept > select inventory class / type > inventory alpha > start number > end number > Validate > click “Add” for more inventory > Submit. **Verify** on the same menu.
- ▶ **Issue Inventory to an Employee — `HIMC`.** Invoke **HIMC** > Function “Add” > Go > From Location Class **DL**, From Location Code **DL** > To Location Class **EM**, To Location Code = **Employee ID** > Accept > select inventory class / type > inventory alpha > start / end number > Validate > Submit. **Verify** on the same menu.
- ▶ **Issue Cheque Book — `HICHB`.** Invoke **HICHB** > Go > account ID > Acknowledgment obtained = “Yes” > Cheque Type **CHQ** > Go > select the cheque-book serial number > Submit. **Verify** on the same menu.
- ▶ **PMJJBY / PMSBY — `CPMY`.** Invoke **CPMY** > Function “Add” > account ID > Go > complete the required fields > Submit. **Verify** on the same menu.
- ▶ **Find New Account No. from Old — `CNAC`.** Invoke **CNAC** > Go > enter **SOL ID + Scheme + Old A/C No.** (or the certificate number) > Submit.

13. Common Inquiry & Report Menus

These read-only / reporting menus are used constantly during counter work and reconciliation.

Menu	Use
`HACLI`	Account ledger inquiry / balance of an account
`HACCDDET` / `HACDET`	General account details / balance details
`HPBP`	Passbook printing
`HFINRPT`	Generation of financial reports
`HPR`	Print reports (closure reports, etc.)
`CWDREP`	Report of SB withdrawals above ₹10,000
`HFTI`	Financial Transaction Inquiry (find / check transactions)
`HAFI`	List of unverified accounts
`HAFSM`	Account freeze / unfreeze
`CNAC`	Old-to-new account number look-up
`HSSI`	SOL (day-end) status inquiry

14. End-of-Day (EOD) / Day-End Commands

Pre-EOD checks (clear everything first)

- ▶ **Teller cash balance** — `HTCPIAE`. Shows the teller cash balance. Invoke **HTCPIAE** > Go > select the employee ID > the balance in hand should be **zero** (it is automatically zero when working through POS).
- ▶ **Cash pending check** — `HCASHPND`. Before EOD, confirm there is **no difference** between cash in hand and cash held in the teller ID.
- ▶ **Pending transactions** — `HFTI`. Invoke **HFTI** > Go > Transaction Status = "E – Entered" and "P – Posted" > Submit. If any transaction is pending, modify / verify it as required.
- ▶ **Unverified accounts** — `HAFI`. Invoke **HAFI** > Go > in "Ref No" enter a dot "." (or two spaces) > "Entered on" = current date > Authorised = "Not Authorised" > Go, then clear them.
- ▶ **Inventory movement** — `HIMI`. Invoke **HIMI** > Go > Transaction date = current date > Submit.
- ▶ **Reports** — `HFINRPT` / `HPR`. **HFINRPT** generates the day's reports and **HPR** prints them.

Day-end execution – three stages

Day-end (EOD/COD) is run in three stages. The post office (SOL) performs the **first** stage; the Circle **CPC** and the **Data Centre** complete the rest. After EOD for the current date, **Begin-of-Day (BOD)** for the next working day is performed automatically.

- ▶ **SOL / office stage** — `HISCOD`, then `CSMDAY`. Invoke **HISCOD** (SOL ID is auto-populated) > enter **0** in Hours and **1** in Minutes > Go; a batch job runs with an ID. **Then run `CSMDAY`** – see the update note below.
- ▶ **CPC stage** — `HSCOD`. The Circle CPC runs **HSCOD** (followed centrally by **HSOLCOP** and **HSCOLD**).
- ▶ **Status check** — `HSSI`. Invoke **HSSI** to see day-end / SOL status (the **EODMON** menu is also used centrally for monitoring).

2025 UPDATE – NEW DAY-END STEP (SB ORDER 12/2025, dated 15.09.2025)

Under the revised accounting in **APT 2.0** with the new **Centralised Processing & Reconciliation Centre (CPRC), Chennai**, the SOL must now execute `CSMDAY` after

`HISCOD`. Departmental post-office data is fetched into APT 2.0 only **once the SOL completes both `HISCOD` and `CSMDAY`**.

CBS-CPCs then ensure that `HISCOD` is executed after the SOL day-end (**HISCOD / CSMDAY**). Branch-office data flows into the BO's DTR once BO end-of-day is triggered by the **Internal Mobile Application (IMA)** in CBS.

Accounting is now on a **transaction-SOL basis** (the office where the transaction is done), and the older Nodal-Office POSB activities are being centralised at CPRC, Chennai.

15. Currency & Sourcing Note

In line with the principle of using only the latest in-force position, the table below separates what is **confirmed against official / primary sources** from items that are **standard operational practice** to be confirmed locally.

Key recent orders & changes reflected in this booklet

Item	Position / source (date)
e-KYC operations	Governed by the SOP at Annexure to SB Order No. 01/2025 (e-KYC CIF via ECCRC ; biometric posting; ₹5,000 paper-based debit rule).
Day-end / accounting change	SB Order 12/2025, dated 15.09.2025 – CPRC Chennai; transaction-SOL accounting; APT 2.0; new SOL step ' CSMDAY ' after HISCOD ; accrual interest for cash certificates discontinued from 01.04.2025.
Non-migration balance fix	SB Order 15/2025, dated 20.11.2025 – SOP for POSA/PPF/SSA balance discrepancies (the earlier HIARM method was discontinued by SB Order 03/2024).
MSSC	New accounts closed 31.03.2025 (DEA/MoF). Existing accounts continue at 7.5%; interest accounted at closure (SB Order 12/2025).
PAN–Aadhaar linkage	PANs issued via Aadhaar Enrolment ID must be linked to the permanent Aadhaar; an inoperative PAN can freeze POSB accounts – confirm the current cut-off when opening / servicing accounts.
Governing manual	POSB CBS Manual , circulated vide SB Order 9/2018, dated 17.07.2018 (corrected up to 31.12.2021) – the authoritative procedure for CBS offices.

HOW TO TREAT THIS MATERIAL

Confirmed: scheme positions and the recent orders above are taken from official Departmental / Finance-Ministry sources, with dates cited.

Operational (confirm locally): the Finacle menu codes and field-level steps follow the POSB CBS Manual and current practice, cross-checked against Departmental / CEPT sources as on June 2026. Exact on-screen fields and some menu behaviours change with version upgrades and fresh CEPT/CPRC advisories.

Before any live transaction or for the examination, verify the current position against the latest **POSB CBS Manual, SB Orders and CEPT/CPRC instructions**. Where a precise figure (e.g. a high-value limit) was uncertain, it has deliberately not been stated rather than risk an outdated number.
