## Consolidation of Products & Centralized Delivery Policy

---

**DISCLAIMER:** *This booklet has been prepared strictly from an examination point of view. While every effort has been made to ensure accuracy and the inclusion of recent changes, amendments, and updates to the relevant Acts, Rules, and Regulations, this document is intended as a study aid only. Readers and students are strongly recommended to refer to official government sources or gazettes for the most reliable and authoritative information.*

## Guidelines of Directorate on Consolidation of Products

### Rationalization of Postal Products & Services

The Government of India has undertaken an exercise to rationalise the suite of postal products & services offered by the Department of Posts. As part of this exercise, keeping in view necessary legal requirements with respect to delivery of summons, notices, and other statutory documents, it is hereby notified that Registration, a value-added service, will now be available under the following revised framework, within the country.

### Revised Framework

- **Speed Post:** Speed Post Document & Speed Post Parcel shall henceforth be the basic mail service for address-specific delivery of accountable postal items in the country.
- **Registration:** Registration will be a value-added service for **Speed Post items only** and shall provide the addressee-specific delivery.
- **Exclusions:** Registration will **not** be available for other categories of mail.

 **LEGISLATIVE NOTE:** Merger of Registered Post service into Speed Post is effective w.e.f. 01.10.2025.

### Processing of Speed Post and Registered Articles at One Hub

#### Bagging Protocol

- **Speed Post & Registered:** Only **one Speed Post bag** with **Orange Color label** containing Speed Post and Registered articles will be sent across all miles (i.e., from Post Offices to the hubs, among the hubs, and hubs to the post offices).
- **Other Articles:** Presently Domestic Book Packets, Gyan Post (earlier Registered Book Packets containing printed books), Periodicals, Registered News Paper, Registered Newspaper bundle, Sample Pattern packet, and Blind Literature having registration are also processed at hubs. Circles shall identify a separate area for such articles and process them accordingly.
- **Sorting & Routing:** A separate sorting diagram shall be maintained for such articles. After processing, these articles shall be sent through **surface routes only**.

- **Labeling:** These bags will be sent in **Green Color Bag Label**.

### Bag Closing Pattern in the Revised Network

Post offices mapped with a National Sorting Hub (NSH) will send the following bags:

1. **TD Bag (Town Delivery):** Containing Speed Post and Registered Articles to be delivered within the post offices mapped with the hub.
2. **NTD Bag (Non-Town Delivery):** Containing the articles to be delivered within the mapped post offices of other hubs.

**Station Articles:** Delivery Post Offices shall keep the station articles (i.e., to be delivered in the delivery jurisdiction of the booking office itself) with them; there is **no need** to send such articles to the hub.

**Surface Route Articles:** Apart from the above, **one TD** and **one NTD** bag containing Domestic Book Packets, Gyan Post, Periodicals, Registered News Paper, Registered Newspaper bundle, Sample Pattern packet, and Blind Literature will also be prepared by the post offices for the hubs. These shall be dealt with by hubs separately through **surface routes** and closed in **Green Color Bag Label**.

### Post Office Mapped with the Intra-Circle Hub (ICH)

Post Offices mapped with the ICH will close the following bags:

- **TD Bag:** To the ICH containing the articles to be delivered among the post offices of the mapped ICHs and other ICHs and other NSHs within the Circle.
- **NTD Bag:** To the NSHs containing the articles to be delivered in the mapped post offices of the mapped NSHs and post office of the hubs of other Circles.

### Closing of Bags from the Hubs

- **Speed Post & Registered:** A single bag containing Speed Post and Registered articles to other hubs/mapped delivery offices will be sent in **Orange Color label**.
- **Surface Articles:** Domestic Book Packets, Registered Book Packets containing printed books, periodicals, Registered News Paper, Registered Newspaper bundle, Sample Pattern packet, and Blind Literature shall be sent in a separate bag through **surface route**. These bags will be sent in **Green Color Bag Label**.

- **Transportation Mode:** Hubs will process the domestic packets and close bags for the destination as per the applicable transport mode (**Air/Surface**). However, it should be super scribed in the right-hand corner of the label, i.e., either **AIR** or **SURFACE**.

### International Track Packets (ITPS) Bag Closing Pattern

- **PO mapped with ICHs:** Will close direct separate bag directly to their **NSHs only**.
- **PO/IBCs (International Business Centers):** To close direct bags for outward ITPS and Registered/Insured letter post articles (letter, small packet, blind Literature, printed paper, M Bag) to mapped FPO/OE in case the daily average is **15 articles** or **10 Kg** mail per category.
- **NSH Responsibility:** In respect of International outward category of mail, all NSHs shall close direct bags to the mapped FPOs **only** for Registered/Insured letter post items and ITPS articles and dispatch the bags through **Air** where air connection is available.

### Compensation Guidelines for Speed Post

The time limit for treating a Speed Post article as "lost" in the absence of final delivery status for the purpose of payment of compensation is:

- **60 days** from the date of booking; OR
- **30 days** from the date of receipt of complaint.

The compensation to the sender of a Speed Post article so declared as lost will be paid thereafter within a period of **10 days**.

---

## Centralized Delivery of All Types of Articles

### Integrated Delivery Centres

Delivery Centres (DCs) with mechanization of all delivery areas can cater to the delivery of all types of articles i.e., Speed Post document, Registered Post, Parcels, ordinary mail, eMOs, etc. Mechanization of delivery areas will ensure coverage of large area by the delivery staff and will facilitate centralized delivery through the Delivery Centres.

Delivery Centres with no counter operations and dedicated supervisory staff will ensure enhanced monitoring of delivery operations which will contribute to overall improvement in the delivery services of the Department.

Mechanization of delivery areas will also result in the enhanced delivery efficiency of the delivery staff with considerable reduction in the travel time. Besides, Delivery Centres will also help the Department in implementing Sunday/Holiday delivery, morning or evening delivery as well as second delivery of mail as is the normal practice in the CEP (Courier, Express & Parcel Services) market.

### Integrated Delivery Centre: Document and Parcel Processing Area Co-located

Document and parcel processing area in these Delivery Centres will be located **adjacent to each other** with common bag receipt and dispatch area. Delivery staff in these Delivery Centres may be assigned for delivery of documents and parcels as is indicated below:

1. **Separate Delivery Staff:** Separate delivery staff for delivery of document and parcels may be assigned subject to justification for separate staff for parcel delivery, as is explained in subsequent paragraphs.
2. **Mix Delivery Staff:** If separate delivery staff for parcels is not **justified**, then delivery staff will be assigned with both the document and parcel delivery in the delivery area.

### Delivery Centre with Separate Processing Areas

Where processing areas for document and Parcel are separately located in a compound and **not adjacent** to each other:

- Document and parcel processing area in these Delivery Centres will not be located adjacent to each other and both the areas are at a distance from each other though in the same compound.
  - Separate area for Parcel processing will only be considered if there is justification for **separate parcel delivery staff**.
  - Bag receipt and dispatch area will be **different** for both the document and parcel processing area.
  - Separate delivery staff in these Delivery Centres will be assigned for delivery of documents and parcels.
  - In these instances, the document delivery centre will be called "**Delivery Centre**" and the Parcel delivery centre will be called "**Nodal Delivery Centre**".
  - Instructions issued by Parcel Directorate relating to setting up of Nodal Delivery Centres including layout design, number of delivery staff, etc., may be followed while setting up these Nodal Delivery Centres.
- 

### Process Flow in Delivery Centre

#### 1. Integrated Delivery Centre (Separate Delivery Staff)

**Scenario:** Document and Parcel Processing Area located adjacent to each other with **Separate Delivery Staff** for Document and Parcel.

**Common Steps:**

- Receipt of bag from MMS (Common Area)
  - Bag Receipt Scan (Common Area)
-

**Specific Process Flow:**

| Step | Ordinary Mail                           | Accountable Mail                                     | Parcels                                                          |
|------|-----------------------------------------|------------------------------------------------------|------------------------------------------------------------------|
| 1    | Opening of Bag                          | Opening of Bag (Including Article Receipt Scan)      | Opening of Bag (Including Article Receipt Scan & Sector Sorting) |
| 2    | Segregation and facing of Ordinary Mail | Sorting                                              | Delivery area wise Sorting                                       |
| 3    | Stamping of Ordinary Mail               | Sequencing                                           | Sequencing                                                       |
| 4    | Sorting                                 | Scanning of articles and generation of Delivery Slip | Scanning of articles and generation of Delivery Slip             |
| 5    | Sequencing                              | Out of Delivery                                      | Out of Delivery                                                  |
| 6    | Out of Delivery                         | Taking of Delivery Staff Return                      | Taking of Delivery Staff Return                                  |
| 7    | Taking of Delivery Staff Return         | Bag Despatch to Sorting Hub                          | Bag Despatch to Sorting Hub                                      |
| 8    | Bag Despatch to Sorting Hub             | Tallying of Abstract                                 | Tallying of Abstract                                             |
| 9    | Tallying of Abstract                    |                                                      |                                                                  |

**2. Integrated Delivery Centre (Mix Delivery Staff)**

**Scenario:** Integrated Delivery Centre with **Mix Delivery Staff** for Delivery of Document and Parcel.

**Common Steps:**

- Receipt of bag from MMS (Common Area)
- Bag Receipt Scan (Common Area)

**Specific Process Flow:**

| Step | Ordinary Mail                           | Accountable Mail                                                                           | Parcels                                                                                    |
|------|-----------------------------------------|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| 1    | Opening of Bag                          | Opening of Bag (Including Article Receipt Scan)                                            | Opening of Bag (Including Article Receipt Scan & Sector Sorting)                           |
| 2    | Segregation and facing of Ordinary Mail | Sorting                                                                                    | Delivery area wise Sorting                                                                 |
| 3    | Stamping of Ordinary Mail               | Sequencing                                                                                 | Sequencing                                                                                 |
| 4    | Sorting                                 | Scanning of articles and generation of <b>Common Delivery Slip</b> for Document and Parcel | Scanning of articles and generation of <b>Common Delivery Slip</b> for Document and Parcel |
| 5    | Sequencing                              | Out of Delivery                                                                            | Out of Delivery                                                                            |
| 6    | Out of Delivery                         | Taking of Delivery Staff Return                                                            | Taking of Delivery Staff Return                                                            |
| 7    | Taking of Delivery Staff Return         | Bag Despatch to Sorting Hub                                                                | Bag Despatch to Sorting Hub                                                                |
| 8    | Bag Despatch to Sorting Hub             | Tallying of Abstract                                                                       | Tallying of Abstract                                                                       |
| 9    | Tallying of Abstract                    |                                                                                            |                                                                                            |

**3. Separately Located Processing Areas**

**Scenario:** Delivery Centre with processing areas for document and Parcel are separately located in the same compound and **not adjacent** to each other.

**A. Document Processing Area**

| Step           | Ordinary Mail                           | Accountable Mail                                     |
|----------------|-----------------------------------------|------------------------------------------------------|
| <b>Receipt</b> | Receipt of Bags from MMS (Common Area)  | Receipt of Bags from MMS (Common Area)               |
| <b>Scan</b>    | Bag Receipt Scan (Common Area)          | Bag Receipt Scan (Common Area)                       |
| <b>1</b>       | Opening of Bags                         | Opening of Bags (Including Article Receipt Scan)     |
| <b>2</b>       | Segregation and facing of Ordinary Mail | Sorting                                              |
| <b>3</b>       | Stamping of Ordinary Mail               | Sequencing                                           |
| <b>4</b>       | Sorting                                 | Scanning of articles and generation of Delivery Slip |
| <b>5</b>       | Sequencing                              | Out of Delivery                                      |
| <b>6</b>       | Out of Delivery                         | Taking of Delivery Staff Return                      |
| <b>7</b>       | Taking of Delivery Staff Return         | Bag Despatch to Sorting Hub                          |
| <b>8</b>       | Bag Despatch to Sorting Hub             | Tallying of Abstract                                 |
| <b>9</b>       | Tallying of Abstract                    |                                                      |

**B. Parcel Processing Area**

| Step           | Parcels                                                         |
|----------------|-----------------------------------------------------------------|
| <b>Receipt</b> | Receipt of Bags from MMS                                        |
| <b>Scan</b>    | Bag Receipt Scan                                                |
| <b>1</b>       | Opening of Bag (Including Parcel Receipt Scan & Sector Sorting) |
| <b>2</b>       | Delivery area wise Sorting                                      |
| <b>3</b>       | Sequencing                                                      |

|   |                                                      |
|---|------------------------------------------------------|
| 4 | Scanning of articles and generation of Delivery Slip |
| 5 | Out of Delivery                                      |
| 6 | Taking of Delivery Staff Return                      |
| 7 | Bag Despatch to Sorting Hub                          |
| 8 | Tallying of Abstract                                 |

### Scanning of Bags

Supervisor or In-charge, Delivery Centre will ensure that bags are scanned at the time of **actual receipt** from mail motor as well as **actual dispatch** of bags through the mail motor.

### Guidelines for Setting up of Delivery Centres

The following guidelines may be followed by field teams while setting up Delivery Centres for delivery of documents, parcels & other articles through Delivery Centre:

#### Delivery Area or Delivery PIN codes

- **Merger:** Delivery area of adjoining delivery Post offices may be merged under one Delivery Centre to be newly set up.
- **Redesign:** Delivery Beats of existing delivery POs may be discontinued and delivery area under new Delivery Centres may be redesigned or recalibrated by considering the overall delivery area of Delivery Centres.
- **Distance Limit:** Delivery area may be so redesigned that one-way distance to be travelled by delivery staff should not be more than **15 km**. However, in exceptional circumstances, one-way distance to be travelled by delivery staff may be more than **15 km** as per operational requirements.
- **Layout:**
  - Layout of the integrated Delivery Centre with document and parcel area co-located may be designed as per the Model Layout.

- Layout for Nodal Delivery Centre as provided under **Parcel Design Manual** as circulated by Parcel Directorate may be referred for designing Parcel area wherever Parcel processing area is not co-located with document processing area.

### Delivery of Parcels through Delivery Centres

- As far as possible, delivery of parcels should be performed through Delivery Centres and Parcel processing areas should be identified separately in Delivery Centres.
- Existing NDCs already functioning in a city may be merged with the Delivery Centres either immediately or over a period of time, if immediate merger of NDC with Delivery Centres is not feasible.
- New NDCs to be opened by the Circle under these instructions due to unavailability of suitable space may also be merged with Delivery Centres over a period of time.
- Parcel delivery area with separate delivery staff may be separately carved out and may not be co-terminus with the document delivery area. Accordingly, separate delivery staff for parcel delivery area and document delivery area may be identified.
- Considering the parcel volume to be delivered through the Delivery Centre, if separate parcel delivery staff is not justified, separate parcel delivery area need not be carved out and a common delivery staff may be assigned for both the delivery of document and parcels in the delivery area.
- Parcel processing area in a Delivery Centre may be separately identified to ensure smooth processing of document and parcels irrespective of the fact whether separate parcel delivery staff is justified or not.

### Mechanized Delivery

- All delivery areas within a delivery centre for delivery of document and Parcels should be mechanized i.e., delivery will only be performed through either **2-wheeler** or through **4-wheeler** for heavy parcels.

- Documents and small parcels will be delivered through **2-wheelers** whereas big and heavy parcels will be delivered through **4-wheelers**.
- **Fuel Reimbursement:** Fuel re-imbursement charges to delivery staff for using their own 2-wheeler may be reimbursed on monthly basis as per policy guidelines issued by the Postal Directorate vide Letter No. **16-02/2024-D** dated **25.11.2024**.
- Circle/Region/Postal Divisions may also hire electric 2-wheeler vehicles through a tendered process for making available the 2-wheeler vehicle to the delivery staff who do not have 2-wheeler vehicle.
- 4-wheeler vehicles may be hired as per the existing practice. However, **India Post branding** on the hired 4-wheeler vehicle may be ensured.

---

### Workload Norms: Number of Articles

Following are the details of tentative number of accountable, unregistered articles and other category of articles which will be normally delivered by a delivery staff under Delivery Centre (DC):

### Mix Delivery Area

Tentative number of articles of each type to be delivered in a mix delivery area by a delivery staff are as detailed below:

- **Ordinary Articles: 95**
- **Regd. Articles/Speed Post Person Specific/Parcels: 42**
- **Speed Post (Document): 43**
- **Money Order/eMO: 1**
- **COD: 3**
- **Insured: 1**

**Note 1:** These calculations of articles to be delivered by a delivery staff are arrived at, after assuming distance travelled by a delivery staff as **30 km / 18 km** in less congested/congested area and travel time of **90 minutes**. Actual number of articles of each

type to be delivered from a Delivery Centre may differ and same may be taken into the account.

**Note 2:** While calculating number of delivery staff required in a Delivery Centre, articles to be delivered in Bulk should **not** be included.

### Exclusive Parcel Delivery Staff

Parcels to be delivered by exclusive Parcel delivery staff are as detailed below:

- **Speed Post/Business/Regd. Parcel: 60**

### Bulk Delivery

**1-2** bulk delivery staff or as required may be identified exclusively in each Delivery Centre (DC) for ensuring separate delivery of the bulk articles received for the addresses under the delivery area of Delivery Centre (DC).

### Number of Delivery Centre (DC) in a City

#### Metro Cities / Other Big Cities

- In Metro cities/other big cities delivering more than **50,000** accountable articles/parcel except bulk per day, a Delivery Centre (DC) may cater to around **50-80** delivery staff with corresponding number of articles to be delivered as per calculations indicated in Para above. Accordingly, the number of Delivery Centre (DC) to be set up in the metro city may be arrived at.
- However, if sufficient space for Delivery Centre (DC) is available for catering more number of delivery staff, then this range of **50-80** delivery staff can be exceeded.
- **Maximum Limit:** However, maximum number of accountable articles that can be delivered by a Delivery Centre (DC) may be kept at **8,000 articles** per day except bulk articles.

#### State Capital / Other Cities

- In the case of State Capital or other cities, a Delivery Centre (DC) may cater to around **15-60** delivery staff with corresponding number of articles to be delivered as per calculations indicated in above. Accordingly, the number of Delivery Centre (DC) to be set up in the city may be arrived at.

- **Maximum Limit:** However, maximum number of accountable articles that can be delivered by a Delivery Centre (DC) may be kept at **5,000 articles** per day except bulk articles.

The number of delivery staff to be covered through a Delivery Centre may differ than the number of delivery staff as suggested above, considering the unique circumstances such as distance to be covered, geographical divide, availability of space, etc.

---

## Infrastructure and Facilities

### Space Requirement

- **Metro Cities:** As indicated above, Delivery Centre (DC) in metro cities/other big cities will be created with around **50-80** delivery staff. It is estimated that an area of around **2,000 to 3,500 Sq. Ft.** will be required for setting up an integrated Delivery Centre (DC), depending upon number of delivery staff catering to the delivery of documents and parcels.
- **State Capital/Other Cities:** As indicated above, integrated Delivery Centre (DC) in State Capitals/other cities will be created with around **15-60** delivery staff. It is estimated that an area of around **1,000 to 2,500 Sq. Ft.** will be required for setting up an integrated Delivery Centre (DC), depending upon number of delivery staff catering to the delivery of documents and parcels.
- **Parking:** Besides, while selecting a location for setting up integrated Delivery Centre (DC) in metro cities/other big cities or state capital/other cities, it must be ensured that the **adequate parking space** is also available for parking of two-wheelers and four-wheeler vehicles to be engaged in the Delivery Centre (DC).

### Facility ID for Delivery Centre

A **Separate Facility ID** may be created for each Delivery Centre as well as Nodal Delivery Centre, if applicable, to ensure creation of separate identity of the office in the **CSI** as well as to ensure the availability of monitoring data in the various BI/MIS reports.

---

## Deployment of Staff

Availability of **2-wheeler vehicle** as well as **smart mobile phone** with the delivery staff must be ensured at the time of selection of Departmental staff/ GDS staff as delivery staff for Delivery Centre.

## PIN Code to be Used

- Each Delivery Centre may be assigned the **PIN code** of any of the merged delivery post office, delivery areas of which will be served through the Delivery Centre.
- However, ideally delivery PIN code of the **major delivery PO** may be assigned to the Delivery Centre.
- CEPT will take necessary action for mapping of all the delivery PIN codes to Delivery Centre's PIN code as well as necessary changes in BI/MIS reports.

## Standardization across Delivery Centre (DC)

1. A **ramp** may be provided on the entry of the Delivery Centre for the receipt/dispatch of the bags through the Bag trolley.
2. Each area in the Delivery Centre i.e., Bag receipt area, bag open area, etc. may be marked as per defined process flow.

---

## Operational Guidelines

### Delivery Slips

- A **common Delivery Slip** will be generated in the case of "Mix Delivery Area" i.e., delivery slip will contain Speed Post document, Registered Post as well as Parcels.
- However, in the case of separate Parcel Area, delivery slip for document and Parcels will be generated **separately**.
- **Bulk Delivery Slip:** Supervisor/Incharge, Delivery Centre will ensure that a Bulk Delivery Slip will be generated for the articles to be delivered in bulk by the Delivery staff.

### Postman Mobile App (PMA)

- All the delivery staff under the Delivery Centre will be equipped with mobile phones either Departmental or mobile devices covered under the Scheme "Bring Your Own Device (BYOD)". Availability of PMA with the delivery staff will be ensured at the time of selection of delivery staff for Delivery Centre.
- Advance tech related functionalities will be introduced in PMA under IT 2.0 project i.e., route optimization, paperless delivery, OTP based delivery, digital collection of payment, App based calling to addressee, etc. as is the norm in the CEP industry, to further upgrade the PMA App.

### Call to Customer

Delivery staff will **make a call** to the addressee before visiting the address for making the delivery to ensure expediting delivery of the articles.

### Delivery of eMO / COD / Custom Duty Articles

- Delivery staff will collect the required cash for the delivery of the Money order/eMO from the designated official in the Delivery Centre.
- Besides, delivery staff after delivery of COD/Custom duty Articles/undelivered eMO will submit the cash, collected from the addresses to the designated official.
- Amount collected **digitally** by the delivery staff from the addresses towards COD/Custom duty Articles will be settled automatically and accounted for by the designated official.

### Equipment to be used in Delivery Centre (DC)

Following operational equipment as is indicated below may be provided in the integrated Delivery Centre (DC):

1. **Computers and scanners** may be supplied as per the existing prescribed specifications.
2. **Document Processing Area:**
  - (a) Opening table for ordinary mail

- (b) Sorting case
- (c) Roller Containers
- (d) Stamping Table
- (e) Postman Table

### 3. Parcel Processing Area:

- (a) Opening Table
- (b) Sequencing Table
- (c) Package Trolley
- (d) Roller Containers
- (e) Standardized delivery bags
- (f) Standardized delivery bag

### Treasury Function

Each Delivery Centre having separate facility ID may be provided with **treasury function** to ensure disbursement of cash to the delivery staff for payment of money order, etc. as well as receipt of cash collected towards delivery of COD, custom duty, undelivered money order, etc.

### Number of Delivery Re-attempts

- **Two** delivery attempts may be made for documents or parcels and undelivered articles may be kept in deposit for maximum of **7 days**.
- Besides, existing instructions regarding serving of intimation to the addressee may be strictly followed.

### Number of Shifts / Second Delivery

- A Normal Delivery Centre (DC) will carry out delivery work as per normal delivery timing wherein duty hour of delivery staff to be fixed from **09.00 hrs to 17.00 hrs**. The timing may be altered depending upon the local factors or location of Delivery Centre.

- However, considering the growing delivery volume as well as requirement from the customers, **second delivery services** from the Delivery Centre may be started as per the requirements.
- Under the second delivery, a delivery facility is used for performing two deliveries in a day i.e., Morning delivery and evening delivery (as is the practice in RMS offices) and can cater to the delivery of twice number of articles, to be delivered through a single delivery centre.

#### Field Units Guidelines for Second Delivery:

1. **Duty Timing:** Timing for the morning delivery or First Delivery may be kept from **09.00 hrs to 17.00 hrs** and timing for evening delivery or Second Delivery may be kept from **12.00 hrs to 20.00 hrs**.
2. **Facility ID:** A separate Facility ID will be created for the Delivery Centre functioning in morning shift and evening shift to ensure separate identity of both the Delivery Centres.
3. **Supervisor & Delivery PA:** Separate Supervisors as well as delivery PAs may be provided for First delivery and Second Delivery Set. Separate Supervisor & Delivery PA will also be provided for Nodal Delivery Centre (Parcel area not co-located with document area) to be set up under these guidelines.

#### Sunday / Holiday Delivery

- Each Delivery Centre will perform delivery of the articles on **Sunday and public holidays** as per requirement.
- However, delivery staff serving office areas may not be operationalized on Sunday and public holidays.
- Besides, duties of Departmental or GDS delivery staff may be fixed in such a manner, to ensure a **weekly off** to each of such delivery staff.

#### Provision of CCTV

Each Delivery Centre will be covered under the CCTV in such a way to ensure coverage of outside of the Delivery Centre including bag exchange area with mail motor service

and processing areas inside the Delivery Centre. An SOP for installation of CCTVs, issued by the Department on **25th February, 2021**.

### Access Control

Supervisor/Incharge, Delivery Centre may ensure the entry of **only authorized staff** inside the Delivery Centre. Entry of outside person inside the Delivery Centre may not be permitted.
